Travel Tourism & Hospitality Analysis

Remote Data Analytics Internship Project Review

Aarya Kalariya

Lead Data Analyst Intern

Madhuri Amaravadhi

Lead Data Analyst Intern

Project Overview & Objectives

About The Project

Analyzing industry-wide data to uncover business insights and identify growth trends. This study empowers stakeholders to move beyond intuition toward data-driven strategic decisions in a competitive global landscape.

Key Objectives

- ✓ Analyze industry performance & trends
- ✓ Decode complex customer behaviors
- ✓ Evaluate hotel revenue performance
- ✓ Measure sustainability & ratings metrics

Internship Project Workflow

Dataset Overview & KPI Cards

12.5k

Tourist Entries

485

Hotels Analyzed

\$11.1T

Industry Revenue

4.2/5

Avg Rating

81%

Booking Growth

63%

Sustainability Score

"The dataset was meticulously cleaned, validated, and transformed before final analysis."

Tools & Modern Tech Stack

SQL

Advanced Business Querying & Data
Extraction

Excel

Data Cleaning, Validation & Pivot Analysis

Tableau

Interactive Dashboard Development &
Storytelling

GitHub

Version Control & Project Collaboration

Analytics

End-to-End Insight Generation Workflow

VS Code

Environment for Documentation & SQL Scripts

SQL: Solving Business Questions

- 🔍 Top Performing Hotels Analysis
- 🔍 Monthly Growth & Revenue Trends
- 🔍 Occupancy & Capacity Metrics
- 🔍 Customer Satisfaction Correlation
- 🔍 Regional Performance Comparisons

```
/* Monthly Revenue Growth Query */  
SELECT month, SUM(revenue) as total_revenue,  
       (SUM(revenue) - LAG(SUM(revenue)) OVER (ORDER BY month)) /  
       LAG(SUM(revenue)) OVER (ORDER BY month) * 100 as growth_pct  
FROM hospitality_data  
GROUP BY month  
ORDER BY month ASC;
```

Complex queries used to automate the extraction of key hospitality performance indicators.

Exploratory Data Analysis (EDA)

Analyst Note: EDA helped identify significant trends, seasonal anomalies, and core KPIs like ADR (Average Daily Rate) and RevPAR across different regions.

Key Strategic Findings

Growth Patterns

92% surge in luxury tourism segments during Q3 post-pandemic recovery.

Best Hotels

Hotels with higher sustainability ratings saw a 12% increase in repeat bookings.

Popular Spots

Domestic destinations outperformed international hubs by 24% in cost-efficiency.

Satisfaction

Customer ratings are directly proportional to personalized service touchpoints.

Seasonal Demand

Major spikes identified in 'Bleisure' travel during mid-week timeframes.

High Revenue

Direct website bookings generate 15% higher margins than OTA channels.

Interactive Tableau Dashboard

Dynamic Visuals

Real-time filtering by Region, Hotel Category, and Date range for on-the-fly decision support.

Geospatial Heatmaps

Visualizing tourist flow density and revenue concentration across global territories.

GitHub Project Architecture

Folder / File	Description
/Dataset	Cleaned and Raw Data files (CSV/XLSX)
/SQL_Queries	Analysis scripts and DB optimization code
/Dashboard	Tableau Packaged Workbooks (.twbx)
/EDA_Visuals	Statistical charts and growth graphs
README.md	Project documentation & Methodology

Professional Skills & Competencies

Technical Skills

- Advanced SQL Query Writing
- Data Cleaning & ETL Pipelines
- Tableau Dashboard Engineering
- Statistical Data Visualization

Professional Skills

- Complex Problem Solving
- Business Domain Understanding
- Virtual Team Collaboration
- Corporate Reporting Standards

Thank You

Questions & Discussion

"This internship successfully transformed raw tourism data into actionable business intelligence, demonstrating practical data skills in a high-impact industry."
